

About Nike

By
Shravanth Vidyacharan

Introduction

- About Nike is a replica of original about Nike web site
- This web Pages contains all the information about Nike
- It contains Article page which has latest news about Nike
- This is a multi-page responsive web-app with contains 4 pages
 - Index / Home page
 - About page
 - Contact page
 - News page

PROBLEM DEFINITION

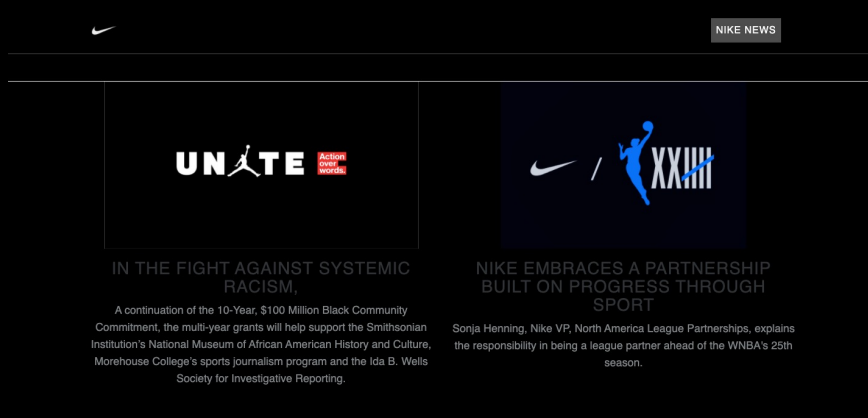

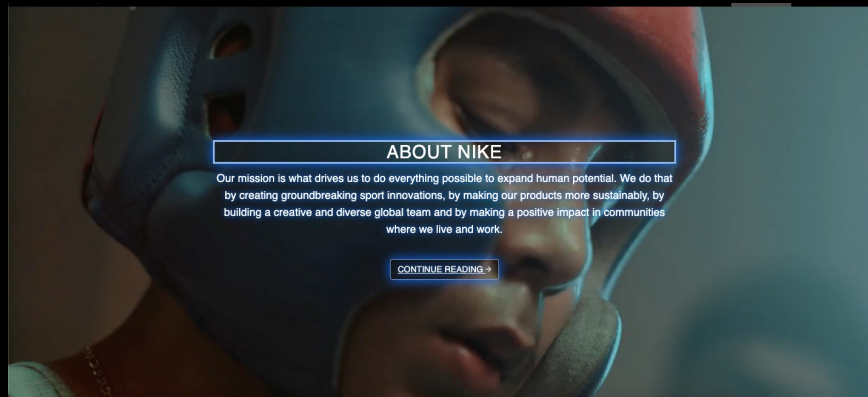

- Now a days almost all the web-apps are responsive and will have many pages.
- The task was to design a multi-page responsive web-app.
- The look and feel must not be outdated and also be user-friendly to users with good animation and design
- Limit colours and fonts. Maintain a thematic colour scheme. For professional sites, try to limit the variety of fonts to three or fewer.
- Web site must be optimized for mobile because Mobile is overtaking desktop and there will be many users using the cellphone then desktop or pc.

METHODOLOGY AND WORK DONE

- I have used Waterfall Methodology to build this web-App
(Analysis, Design, Implementation, testing)
- I have used Sublime text editor to build this website
- I have also used chrome for visuals and also check for test with chrome Lighthouse extension
- I have developed this site using Hyper text markup language (HTML), Cascading Style Sheet (CSS) and Java Script.
- I have tested the website in mobile device too

RESULTS

- Here are some of the outputs of the web page
